Cálculo de Voltaje, Corriente y Resistencia (Ley de Ohm)

Ley de Ohm

$$V = I \times R$$

Ejercicios

1. **Datos:** $I = 2 A, R = 5 \Omega$

$$V = I \times R = 2 \times 5 = \boxed{10 V}$$

2. **Datos:** $I = 0.5 A, R = 10000 \Omega$

$$V = I \times R = 0.5 \times 10000 = \boxed{5000 V}$$

3. **Datos:** V = 600 V, $R = 330 \Omega$

$$I = \frac{V}{R} = \frac{600}{330} = \boxed{1.82 \, A}$$

4. **Datos:** V = 5 V, $R = 220 \Omega$

$$I = \frac{V}{R} = \frac{5}{220} = \boxed{0.0227 \, A}$$

5. **Datos:** V = 6V, I = 6A

$$R = \frac{V}{I} = \frac{6}{6} = \boxed{1\,\Omega}$$

6. **Datos:** V = 5 V, I = 0.02 A

$$R = \frac{V}{I} = \frac{5}{0.02} = \boxed{250\,\Omega}$$
